Career Analysis

This career reading uses a real natal calculation. It talks to you first: what fits, how money arrives, which years to push.

01

Talent and core strength

The career engine is Jupiter. It rules the lagna and the 10th: how you stand in the world and how work is seen run on one wire. That wire sits in Aries in the 2nd, next to debilitated retrograde Saturn. The strength is not performing diligence. It is making a complex thing clear, and naming a fee you can sleep with.

Sun and Mercury sit in Sagittarius in the 10th. People meet your mind and your voice first. Mercury is combust, so speech can be covered by "who should I sound like." The durable edge is your own judgment, not an institution's tone.

Rahu in Cancer in the 5th points appetite at intelligence that can be seen, with a caretaking flavor: the work you want should make people feel understood. Ketu in Capricorn in the 11th: circles change. Do not nail identity to one hill.

02

Best-fit career directions

The directions that fit turn knowledge, belief, and speech into credit people will pay for. Being seen is not vanity. It is how this chart works. The question is whether the voice they hear is yours, or an institution's amplifier.

Advice and strategic communication. Make a structure other people cannot say. Charge by project or retainer. The 10th-house Sun wants a podium; Jupiter wants the belief said out loud.

Content, courses, publishing. Turn the explaining you already do into a repeatable product, not endless one-off firefighting. 5th-house Rahu will push private making into something you can price.

Teaching and training. Roles that need judgment and a room of people. Cross-border or remote professional work also fits: 12th-house Mars puts action overseas, at night, in unseen prep.

A silent bolt in a machine is a poor long fit. What is missing is a product, not another stage.

03

Wealth path

Wealth runs through houses 2 and 11. Aries 2nd holds Jupiter and Saturn. Capricorn 11th holds Ketu; Saturn, lord of 11, returns to the 2nd. Income comes from saying the craft clearly and pricing it — from long credit, not a windfall.

Saturn slows the payout and also lets you name a fee you can sleep with. Debilitation is not "no ability." It is ability that has to be ground: you understand duty more than peers, and you dislike performing diligence.

Ketu in the 11th warns that networks change blood. A circle's peak is often the cue to prepare the next one. Money passes through speech, pricing, and the family ledger, not through a speculative side door.

04

Peak career windows

Only the windows that change how work walks. Calendar years; age from January 2000.

Mahadasha sets the decade's weather. Antardasha says which year to move. Right weather is not the same as harvest today.

Window	Age	Theme
Feb 2026 — Mar 2027	about 26–27	Saturn–Mars. Back-office repair, outgo, foreign or hidden action. Build the product base. Do not treat this year as a public push.
Mar 2027 — Jan 2030	about 27–30	Saturn–Rahu. Ambition on stage, irregular openings, a possible track change. Turn making into a deliverable.
Jan 2030 — Aug 2032	about 30–32	Saturn–Jupiter. Conversion. Career credit and income move together. Good for long contracts.
from Aug 2032	about 32	Mercury mahadasha, seventeen years. Speech, trade, learning, media. The opening stretch to 2035 is for new tools and new rooms.
around 2036	about 36	Mercury–Venus. Outer collaboration eases; fees are easier to accept. The risk is spending the good year in one go.

05

What to do in this phase

This is Saturn–Mars, 15 Feb 2026 to 26 Mar 2027. Mars rules 2 and 9 and lives in 12. Money goes out, stamina goes dark, or you are abroad, remote, working nights.

Do not pick a public hard-collision fight in these thirteen months. Turn the explaining you already do into a spec: outline, fee, delivery steps. Finish what you already promised. Save large expansion for Saturn–Jupiter in 2030–2032.

Price follows credit, not anxiety. The 10th already puts you on stage. What is missing now is repeatable delivery, not another stage.
